

~~OFFICIAL USE ONLY~~

DIRECTOR OF CENTRAL INTELLIGENCE  
**Security Committee**

SECOM-D-014

20 January 1984

MEMORANDUM FOR: Members, DCI Security Committee

FROM:

Chairman

SUBJECT: Behavioral Science/Personnel Security Seminar

1. At the SECOM Seminar in October 1983 and in the 1984 SECOM Goals and Objectives paper, the committee endorsed a proposed seminar on the role of behavioral science in personnel security. It is time to begin planning the program.

2. I would appreciate suggestions from SECOM members on topics and background material for use in the seminar, as well as for speakers and other participants. In view of the very heavy current tasking upon the Personnel Security Subcommittee, I intend to have the SECOM staff provide as much planning support as possible to this project.

3. As examples of the proposed content of the seminar, the attachment identifies some possible topics and source documents. Your comments on these and suggestions for additional items and prospective participants are requested. A response by 15 February would be appreciated.
